

**MARKED UP VERSION OF SPECIFICATION**

The description of the invention which follows, together with the accompanying drawings should not be construed as limiting the invention to the example shown and described, because those skilled in the art to which this invention appertains will be able to devise other forms thereof within the ambit of the appended claims.

Fig. 1 is a front elevational view of an exemplary facial jewelry display according to the present invention;

Figs. 2 and 3 are respectively top and rear isolated views of a [Band-Aid] BAND-AID adhesive bandage component of the display;

Fig. 4 is a partial top view, on an enlarged scale, illustrating details of the exemplary facial jewelry display of Fig. 1; and

Fig. 5 is a cross sectional view, as taken along line 5-5 of Fig. 4, illustrating further structural details.

A fashion trend currently in practice is to display low-cost objects, such as costume jewelry, in the specific form of rhinestones of glass construction material, individually and collectively designated 10, at select locations on the person 12, such as on her cheek, as noted at 14, and the heretofore unrelated practice of covering minor cuts with a [Band-Aid,] BAND-AID adhesive bandage generally designated 16, as defined in words or in substance in WEBSTER'S COLLEGE DICTIONARY, and as supplemented by what is known by common experience, as "an adhesive bandage with a gauze pad in the center, used to cover minor abrasions and cuts," having as a commercially available article of manufacture, a central gauze pad 18 with opposite direction left and right extending adhesive strips 20 and 22, wherein the gauze pad 18 has an array, generally
